Download the latest version of Malwarebytes from the link given below. Open the downloaded file and run it. Follow the instructions and complete the process. Done!The present invention relates to a method of fabricating a semiconductor device, and more particularly, to a method of forming a polycrystalline silicon pattern in a semiconductor device. Semiconductor devices such as memory devices, semiconductor integrated circuits, and logic devices are essential for modern technology. Memory devices are classified as volatile memory devices or non-volatile memory devices. Volatile memory devices lose data stored therein when power is interrupted. Examples of volatile memory devices include dynamic random access memory (DRAM), static RAM (SRAM), and synchronous DRAM (SDRAM). Non-volatile memory devices can retain data stored therein even when power is interrupted. Examples of non-volatile memory devices include read only memory (ROM), programmable ROM (PROM), erasable PROM (EPROM), electrically EPROM (EEPROM), flash memory, phase-change RAM (PRAM), magnetic RAM (MRAM 82157476af
